1 **ACGME Program Requirements for Graduate Medical Education**
2 **in Cardiovascular Disease**

3
4 **Common Program Requirements (Fellowship) are in BOLD**

5
6 Where applicable, text in italics describes the underlying philosophy of the requirements in that
7 section. These philosophic statements are not program requirements and are therefore not
8 citable.
9

Background and Intent: These fellowship requirements reflect the fact that these learners have already completed the first phase of graduate medical education. Thus, the Common Program Requirements (Fellowship) are intended to explain the differences.

10
11 **Introduction**

12
13 **Int.A.** *Fellowship is advanced graduate medical education beyond a core*
14 *residency program for physicians who desire to enter more specialized*
15 *practice. Fellowship-trained physicians serve the public by providing*
16 *subspecialty care, which may also include core medical care, acting as a*
17 *community resource for expertise in their field, creating and integrating*
18 *new knowledge into practice, and educating future generations of*
19 *physicians. Graduate medical education values the strength that a diverse*
20 *group of physicians brings to medical care.*

21
22 *Fellows who have completed residency are able to practice independently*
23 *in their core specialty. The prior medical experience and expertise of*
24 *fellows distinguish them from physicians entering into residency training.*
25 *The fellow’s care of patients within the subspecialty is undertaken with*
26 *appropriate faculty supervision and conditional independence. Faculty*
27 *members serve as role models of excellence, compassion,*
28 *professionalism, and scholarship. The fellow develops deep medical*
29 *knowledge, patient care skills, and expertise applicable to their focused*
30 *area of practice. Fellowship is an intensive program of subspecialty clinical*
31 *and didactic education that focuses on the multidisciplinary care of*
32 *patients. Fellowship education is often physically, emotionally, and*
33 *intellectually demanding, and occurs in a variety of clinical learning*
34 *environments committed to graduate medical education and the well-being*
35 *of patients, residents, fellows, faculty members, students, and all members*
36 *of the health care team.*

37
38 *In addition to clinical education, many fellowship programs advance*
39 *fellows’ skills as physician-scientists. While the ability to create new*
40 *knowledge within medicine is not exclusive to fellowship-educated*
41 *physicians, the fellowship experience expands a physician’s abilities to*
42 *pursue hypothesis-driven scientific inquiry that results in contributions to*
43 *the medical literature and patient care. Beyond the clinical subspecialty*
44 *expertise achieved, fellows develop mentored relationships built on an*
45 *infrastructure that promotes collaborative research.*

46
47 **Int.B.** **Definition of Subspecialty**

48
49 Cardiovascular disease is the internal medicine subspecialty that focuses on
50 prevention, diagnosis, and management of disorders of the cardiovascular
51 system.
52

53 **Int.C. Length of Educational Program**

54
55 The educational program in cardiovascular disease must be 36 months in length.
56 (Core)*

57
58 **I. Oversight**

59
60 **I.A. Sponsoring Institution**

61
62 *The Sponsoring Institution is the organization or entity that assumes the*
63 *ultimate financial and academic responsibility for a program of graduate*
64 *medical education consistent with the ACGME Institutional Requirements.*

65
66 *When the Sponsoring Institution is not a rotation site for the program, the*
67 *most commonly utilized site of clinical activity for the program is the*
68 *primary clinical site.*
69

Background and Intent: Participating sites will reflect the health care needs of the community and the educational needs of the fellows. A wide variety of organizations may provide a robust educational experience and, thus, Sponsoring Institutions and participating sites may encompass inpatient and outpatient settings including, but not limited to a university, a medical school, a teaching hospital, a nursing home, a school of public health, a health department, a public health agency, an organized health care delivery system, a medical examiner's office, an educational consortium, a teaching health center, a physician group practice, federally qualified health center, or an educational foundation.

70
71 **I.A.1. The program must be sponsored by one ACGME-accredited**
72 **Sponsoring Institution. (Core)***

73
74 **I.B. Participating Sites**

75
76 *A participating site is an organization providing educational experiences or*
77 *educational assignments/rotations for fellows.*

78
79 **I.B.1. The program, with approval of its Sponsoring Institution, must**
80 **designate a primary clinical site. (Core)**

81
82 **I.B.1.a)** A cardiovascular disease fellowship must function as an integral
83 part of an ACGME-accredited residency in internal medicine. (Core)

84
85 **I.B.1.b)** The Sponsoring Institution must establish the cardiovascular
86 disease fellowship within a department of internal medicine or an
87 administrative unit whose primary mission is the advancement of
88 internal medicine subspecialty education and patient care. (Detail)
89

- 90 I.B.1.c) The Sponsoring Institution must ensure that there is a reporting
91 relationship with the program director of the internal medicine
92 residency program to ensure compliance with ACGME
93 accreditation requirements. ^(Core)
94
- 95 **I.B.2. There must be a program letter of agreement (PLA) between the**
96 **program and each participating site that governs the relationship**
97 **between the program and the participating site providing a required**
98 **assignment.** ^(Core)
99
- 100 **I.B.2.a) The PLA must:**
- 101
- 102 **I.B.2.a).(1) be renewed at least every 10 years; and,** ^(Core)
103
- 104 **I.B.2.a).(2) be approved by the designated institutional official**
105 **(DIO).** ^(Core)
106
- 107 **I.B.3. The program must monitor the clinical learning and working**
108 **environment at all participating sites.** ^(Core)
109
- 110 **I.B.3.a) At each participating site there must be one faculty member,**
111 **designated by the program director, who is accountable for**
112 **fellow education for that site, in collaboration with the**
113 **program director.** ^(Core)
114

Background and Intent: While all fellowship programs must be sponsored by a single ACGME-accredited Sponsoring Institution, many programs will utilize other clinical settings to provide required or elective training experiences. At times it is appropriate to utilize community sites that are not owned by or affiliated with the Sponsoring Institution. Some of these sites may be remote for geographic, transportation, or communication issues. When utilizing such sites, the program must designate a faculty member responsible for ensuring the quality of the educational experience. In some circumstances, the person charged with this responsibility may not be physically present at the site, but remains responsible for fellow education occurring at the site. The requirements under I.B.3. are intended to ensure that this will be the case.

Suggested elements to be considered in PLAs will be found in the ACGME Program Director's Guide to the Common Program Requirements. These include:

- **Identifying the faculty members who will assume educational and supervisory responsibility for fellows**
- **Specifying the responsibilities for teaching, supervision, and formal evaluation of fellows**
- **Specifying the duration and content of the educational experience**
- **Stating the policies and procedures that will govern fellow education during the assignment**

- 115
- 116 **I.B.4. The program director must submit any additions or deletions of**
117 **participating sites routinely providing an educational experience,**
118 **required for all fellows, of one month full time equivalent (FTE) or**
119 **more through the ACGME's Accreditation Data System (ADS).** ^(Core)

120
121 **I.C. The program, in partnership with its Sponsoring Institution, must engage in**
122 **practices that focus on mission-driven, ongoing, systematic recruitment**
123 **and retention of a diverse and inclusive workforce of residents (if present),**
124 **fellows, faculty members, senior administrative staff members, and other**
125 **relevant members of its academic community.** ^(Core)
126

Background and Intent: It is expected that the Sponsoring Institution has, and programs implement, policies and procedures related to recruitment and retention of minorities underrepresented in medicine and medical leadership in accordance with the Sponsoring Institution’s mission and aims. The program’s annual evaluation must include an assessment of the program’s efforts to recruit and retain a diverse workforce, as noted in V.C.1.c).(5).(c).

127
128 **I.D. Resources**

129
130 **I.D.1. The program, in partnership with its Sponsoring Institution, must**
131 **ensure the availability of adequate resources for fellow education.**
132 ^(Core)

133
134 I.D.1.a) Space and Equipment

135
136 There must be space and equipment for the program, including
137 meeting rooms, examination rooms, computers, visual and other
138 educational aids, and work/study space. ^(Core)

139
140 I.D.1.b) Facilities

141
142 I.D.1.b).(1) Inpatient and outpatient systems must be in place to
143 prevent fellows from performing routine clerical functions,
144 such as scheduling tests and appointments, and retrieving
145 records and letters. ^(Detail)

146
147 I.D.1.b).(2) The sponsoring institution must provide the broad range of
148 facilities and clinical support services required to provide
149 comprehensive care of adult patients. ^(Core)

150
151 I.D.1.b).(3) Fellows must have access to a lounge facility during
152 assigned duty hours. ^(Detail)

153
154 I.D.1.b).(4) When fellows are in the hospital, assigned night duty, or
155 called in from home, they must be provided with a secure
156 space for their belongings. ^(Detail)

157
158 I.D.1.c) Laboratory Services

159
160 Each of the following must be present at the primary clinical site:

161
162 I.D.1.c).(1) cardiac catheterization laboratories, including cardiac
163 hemodynamics and a full range of interventional
164 cardiology; ^(Core)

- 165
166 I.D.1.c).(2) cardiac radiology laboratory, including magnetic resonance
167 imaging (MRI) and computed tomography (CT); ^(Detail)
168
169 I.D.1.c).(3) cardiac radionuclide laboratories; ^(Detail)
170
171 I.D.1.c).(4) echocardiography laboratories, including Doppler and
172 transesophageal echocardiography; ^(Core)
173
174 I.D.1.c).(5) electrocardiogram (ECG), ambulatory ECG, and exercise
175 testing laboratories; ^(Core)
176
177 I.D.1.c).(6) electrophysiology laboratories; and, ^(Core)
178
179 I.D.1.c).(7) noninvasive vascular laboratory. ^(Core)
180
181 I.D.1.d) Other Support Services
182
183 The following must be present at the primary clinical site:
184
185 I.D.1.d).(1) a cardiac intensive care unit; and, ^(Core)
186
187 I.D.1.d).(2) an active cardiac surgery program. ^(Core)
188
189 I.D.1.e) Medical Records
190
191 Access to an electronic health record should be provided. In the
192 absence of an existing electronic health record, institutions must
193 demonstrate institutional commitment to its development, and
194 progress towards its implementation. ^(Core)
195
196 I.D.1.f) Patient Population
197
198 I.D.1.f).(1) The patient population must have a variety of clinical
199 problems and stages of cardiovascular diseases. ^(Core)
200
201 I.D.1.f).(2) There must be patients of each gender, with a broad age
202 range, including geriatric patients. ^(Core)
203
204 I.D.1.f).(3) A sufficient number of patients must be available to enable
205 each fellow to achieve the required educational outcomes.
206 ^(Core)
207
208 **I.D.2. The program, in partnership with its Sponsoring Institution, must**
209 **ensure healthy and safe learning and working environments that**
210 **promote fellow well-being and provide for:** ^(Core)
211
212 **I.D.2.a) access to food while on duty;** ^(Core)
213

214 I.D.2.b) safe, quiet, clean, and private sleep/rest facilities available
215 and accessible for fellows with proximity appropriate for safe
216 patient care; ^(Core)
217

Background and Intent: Care of patients within a hospital or health system occurs continually through the day and night. Such care requires that fellows function at their peak abilities, which requires the work environment to provide them with the ability to meet their basic needs within proximity of their clinical responsibilities. Access to food and rest are examples of these basic needs, which must be met while fellows are working. Fellows should have access to refrigeration where food may be stored. Food should be available when fellows are required to be in the hospital overnight. Rest facilities are necessary, even when overnight call is not required, to accommodate the fatigued fellow.

218
219 I.D.2.c) clean and private facilities for lactation that have refrigeration
220 capabilities, with proximity appropriate for safe patient care;
221 ^(Core)
222

Background and Intent: Sites must provide private and clean locations where fellows may lactate and store the milk within a refrigerator. These locations should be in close proximity to clinical responsibilities. It would be helpful to have additional support within these locations that may assist the fellow with the continued care of patients, such as a computer and a phone. While space is important, the time required for lactation is also critical for the well-being of the fellow and the fellow's family, as outlined in VI.C.1.d).(1).

223
224 I.D.2.d) security and safety measures appropriate to the participating
225 site; and, ^(Core)
226

227 I.D.2.e) accommodations for fellows with disabilities consistent with
228 the Sponsoring Institution's policy. ^(Core)
229

230 I.D.3. Fellows must have ready access to subspecialty-specific and other
231 appropriate reference material in print or electronic format. This
232 must include access to electronic medical literature databases with
233 full text capabilities. ^(Core)
234

235 I.D.4. The program's educational and clinical resources must be adequate
236 to support the number of fellows appointed to the program. ^(Core)
237

238 I.E. *A fellowship program usually occurs in the context of many learners and
239 other care providers and limited clinical resources. It should be structured
240 to optimize education for all learners present.*

241
242 I.E.1. Fellows should contribute to the education of residents in core
243 programs, if present. ^(Core)
244

Background and Intent: The clinical learning environment has become increasingly complex and often includes care providers, students, and post-graduate residents and fellows from multiple disciplines. The presence of these practitioners and their learners

enriches the learning environment. Programs have a responsibility to monitor the learning environment to ensure that fellows' education is not compromised by the presence of other providers and learners, and that fellows' education does not compromise core residents' education.

245
246
247
248
249
250
251
252
253
254
255
256
257
258
259
260

II. Personnel

II.A. Program Director

II.A.1. There must be one faculty member appointed as program director with authority and accountability for the overall program, including compliance with all applicable program requirements. ^(Core)

II.A.1.a) The Sponsoring Institution's Graduate Medical Education Committee (GMEC) must approve a change in program director. ^(Core)

II.A.1.b) Final approval of the program director resides with the Review Committee. ^(Core)

Background and Intent: While the ACGME recognizes the value of input from numerous individuals in the management of a fellowship, a single individual must be designated as program director and have overall responsibility for the program. The program director's nomination is reviewed and approved by the GMEC. Final approval of the program director resides with the applicable ACGME Review Committee.

261
262
263
264
265
266
267
268
269
270
271
272
273

II.A.2. The program director and, as applicable, the program's leadership team, must be provided with support adequate for administration of the program based upon its size and configuration. ^(Core)

II.A.2.a) ~~At a minimum, the program director must be provided with the salary support required to devote 20-50 percent FTE of non-clinical time to the administration of the program. ^(Core)~~

At a minimum, the program director must be provided with the dedicated time and support specified below for administration of the program: ^(Core)

<u>Number of Approved Fellow Positions</u>	<u>Minimum Support Required (FTE)</u>
<u><7</u>	<u>.2</u>
<u>7-9</u>	<u>.25</u>
<u>10-12</u>	<u>.3</u>
<u>13-15</u>	<u>.35</u>
<u>16-18</u>	<u>.4</u>
<u>19-21</u>	<u>.45</u>
<u>>21</u>	<u>.5</u>

274
275
276

II.A.2.b) Programs must appoint at least one of the subspecialty-certified core faculty members to be associate program director(s). The

277
278
279
280

associate program directors(s) must be provided with support equal to a dedicated minimum time for administration of the program as follows: (Core)

<u>Number of Approved Fellow Positions</u>	<u>Minimum Support Required (FTE)</u>
<u><7</u>	<u>0</u>
<u>7-9</u>	<u>.13</u>
<u>10-12</u>	<u>.14</u>
<u>13-15</u>	<u>.15</u>
<u>16-18</u>	<u>.16</u>
<u>19-21</u>	<u>.17</u>
<u>22-24</u>	<u>.18</u>
<u>25-27</u>	<u>.24</u>
<u>28-30</u>	<u>.30</u>
<u>31-33</u>	<u>.36</u>
<u>34-36</u>	<u>.42</u>
<u>37-39</u>	<u>.48</u>
<u>40-42</u>	<u>.54</u>
<u>43-45</u>	<u>.60</u>
<u>46-48</u>	<u>.66</u>

281

Background and Intent: To achieve successful graduate medical education, individuals serving as education and administrative leaders of fellowship programs, as well as those significantly engaged in the education, supervision, evaluation, and mentoring of fellows, must have sufficient dedicated professional time to perform the vital activities required to sustain an accredited program.

The ultimate outcome of graduate medical education is excellence in fellow education and patient care.

The program director and, as applicable, the program leadership team, devote a portion of their professional effort to the oversight and management of the fellowship program, as defined in II.A.4.-II.A.4.a).(16). Both provision of support for the time required for the leadership effort and flexibility regarding how this support is provided are important. Programs, in partnership with their Sponsoring Institutions, may provide support for this time in a variety of ways. Examples of support may include, but are not limited to, salary support, supplemental compensation, educational value units, or relief of time from other professional duties.

Program directors and, as applicable, members of the program leadership team, who are new to the role may need to devote additional time to program oversight and management initially as they learn and become proficient in administering the program. It is suggested that during this initial period the support described above be increased as needed.

282
283
284

II.A.3. Qualifications of the program director:

285 **II.A.3.a)** **must include subspecialty expertise and qualifications**
286 **acceptable to the Review Committee; and,** ^(Core)
287

288 II.A.3.a).(1) The program director must have administrative experience
289 and at least three years of participation as an active faculty
290 member in an ACGME-accredited internal medicine
291 residency or cardiovascular disease fellowship. ^(Core)
292

293 **II.A.3.b)** **must include current certification in the subspecialty for**
294 **which they are the program director by the American Board**
295 **of Internal Medicine (ABIM) or by the American Osteopathic**
296 **Board of Internal Medicine (AOBIM), or subspecialty**
297 **qualifications that are acceptable to the Review Committee.**
298 ^(Core)
299

300 II.A.3.b).(1) The Review Committee only accepts current ABIM or
301 AOBIM certification in cardiovascular disease. ^(Core)
302

303 **II.A.4. Program Director Responsibilities**
304

305 **The program director must have responsibility, authority, and**
306 **accountability for: administration and operations; teaching and**
307 **scholarly activity; fellow recruitment and selection, evaluation, and**
308 **promotion of fellows, and disciplinary action; supervision of fellows;**
309 **and fellow education in the context of patient care.** ^(Core)
310

311 **II.A.4.a) The program director must:**
312

313 **II.A.4.a).(1) be a role model of professionalism;** ^(Core)
314

Background and Intent: The program director, as the leader of the program, must serve as a role model to fellows in addition to fulfilling the technical aspects of the role. As fellows are expected to demonstrate compassion, integrity, and respect for others, they must be able to look to the program director as an exemplar. It is of utmost importance, therefore, that the program director model outstanding professionalism, high quality patient care, educational excellence, and a scholarly approach to work. The program director creates an environment where respectful discussion is welcome, with the goal of continued improvement of the educational experience.

315
316 **II.A.4.a).(2) design and conduct the program in a fashion**
317 **consistent with the needs of the community, the**
318 **mission(s) of the Sponsoring Institution, and the**
319 **mission(s) of the program;** ^(Core)
320

Background and Intent: The mission of institutions participating in graduate medical education is to improve the health of the public. Each community has health needs that vary based upon location and demographics. Programs must understand the social determinants of health of the populations they serve and incorporate them in the design and implementation of the program curriculum, with the ultimate goal of addressing these needs and health disparities.

321

322 II.A.4.a).(3) administer and maintain a learning environment
323 conducive to educating the fellows in each of the
324 ACGME Competency domains; ^(Core)
325

Background and Intent: The program director may establish a leadership team to assist in the accomplishment of program goals. Fellowship programs can be highly complex. In a complex organization the leader typically has the ability to delegate authority to others, yet remains accountable. The leadership team may include physician and non-physician personnel with varying levels of education, training, and experience.

326
327 II.A.4.a).(4) develop and oversee a process to evaluate candidates
328 prior to approval as program faculty members for
329 participation in the fellowship program education and
330 at least annually thereafter, as outlined in V.B.; ^(Core)
331

332 II.A.4.a).(5) have the authority to approve program faculty
333 members for participation in the fellowship program
334 education at all sites; ^(Core)
335

336 II.A.4.a).(6) have the authority to remove program faculty
337 members from participation in the fellowship program
338 education at all sites; ^(Core)
339

340 II.A.4.a).(7) have the authority to remove fellows from supervising
341 interactions and/or learning environments that do not
342 meet the standards of the program; ^(Core)
343

Background and Intent: The program director has the responsibility to ensure that all who educate fellows effectively role model the Core Competencies. Working with a fellow is a privilege that is earned through effective teaching and professional role modeling. This privilege may be removed by the program director when the standards of the clinical learning environment are not met.

There may be faculty in a department who are not part of the educational program, and the program director controls who is teaching the residents.

344
345 II.A.4.a).(8) submit accurate and complete information required
346 and requested by the DIO, GMEC, and ACGME; ^(Core)
347

348 II.A.4.a).(9) provide applicants who are offered an interview with
349 information related to the applicant's eligibility for the
350 relevant subspecialty board examination(s); ^(Core)
351

352 II.A.4.a).(10) provide a learning and working environment in which
353 fellows have the opportunity to raise concerns and
354 provide feedback in a confidential manner as
355 appropriate, without fear of intimidation or retaliation;
356 ^(Core)
357

- 358 **II.A.4.a).(11)** ensure the program’s compliance with the Sponsoring
 359 Institution’s policies and procedures related to
 360 grievances and due process; ^(Core)
 361
- 362 **II.A.4.a).(12)** ensure the program’s compliance with the Sponsoring
 363 Institution’s policies and procedures for due process
 364 when action is taken to suspend or dismiss, not to
 365 promote, or not to renew the appointment of a fellow;
 366 ^(Core)
 367

Background and Intent: A program does not operate independently of its Sponsoring Institution. It is expected that the program director will be aware of the Sponsoring Institution’s policies and procedures, and will ensure they are followed by the program’s leadership, faculty members, support personnel, and fellows.

- 368
- 369 **II.A.4.a).(13)** ensure the program’s compliance with the Sponsoring
 370 Institution’s policies and procedures on employment
 371 and non-discrimination; ^(Core)
 372
- 373 **II.A.4.a).(13).(a)** **Fellows must not be required to sign a non-**
 374 **competition guarantee or restrictive covenant.**
 375 ^(Core)
 376
- 377 **II.A.4.a).(14)** document verification of program completion for all
 378 graduating fellows within 30 days; ^(Core)
 379
- 380 **II.A.4.a).(15)** provide verification of an individual fellow’s
 381 completion upon the fellow’s request, within 30 days;
 382 and, ^(Core)
 383

Background and Intent: Primary verification of graduate medical education is important to credentialing of physicians for further training and practice. Such verification must be accurate and timely. Sponsoring Institution and program policies for record retention are important to facilitate timely documentation of fellows who have previously completed the program. Fellows who leave the program prior to completion also require timely documentation of their summative evaluation.

- 384
- 385 **II.A.4.a).(16)** obtain review and approval of the Sponsoring
 386 Institution’s DIO before submitting information or
 387 requests to the ACGME, as required in the Institutional
 388 Requirements and outlined in the ACGME Program
 389 Director’s Guide to the Common Program
 390 Requirements. ^(Core)
 391
- 392 **II.B. Faculty**
- 393
- 394 *Faculty members are a foundational element of graduate medical education*
 395 *– faculty members teach fellows how to care for patients. Faculty members*
 396 *provide an important bridge allowing fellows to grow and become practice*
 397 *ready, ensuring that patients receive the highest quality of care. They are*
 398 *role models for future generations of physicians by demonstrating*

399 *compassion, commitment to excellence in teaching and patient care,*
400 *professionalism, and a dedication to lifelong learning. Faculty members*
401 *experience the pride and joy of fostering the growth and development of*
402 *future colleagues. The care they provide is enhanced by the opportunity to*
403 *teach. By employing a scholarly approach to patient care, faculty members,*
404 *through the graduate medical education system, improve the health of the*
405 *individual and the population.*

406
407 *Faculty members ensure that patients receive the level of care expected*
408 *from a specialist in the field. They recognize and respond to the needs of*
409 *the patients, fellows, community, and institution. Faculty members provide*
410 *appropriate levels of supervision to promote patient safety. Faculty*
411 *members create an effective learning environment by acting in a*
412 *professional manner and attending to the well-being of the fellows and*
413 *themselves.*
414

Background and Intent: “Faculty” refers to the entire teaching force responsible for educating fellows. The term “faculty,” including “core faculty,” does not imply or require an academic appointment.

415
416 **II.B.1.** For each participating site, there must be a sufficient number of
417 faculty members with competence to instruct and supervise all
418 fellows at that location. ^(Core)
419

420 **II.B.2.** Faculty members must:

421
422 **II.B.2.a)** be role models of professionalism; ^(Core)
423

424 **II.B.2.b)** demonstrate commitment to the delivery of safe, quality,
425 cost-effective, patient-centered care; ^(Core)
426

Background and Intent: Patients have the right to expect quality, cost-effective care with patient safety at its core. The foundation for meeting this expectation is formed during residency and fellowship. Faculty members model these goals and continually strive for improvement in care and cost, embracing a commitment to the patient and the community they serve.

427
428 **II.B.2.c)** demonstrate a strong interest in the education of fellows; ^(Core)
429

430 **II.B.2.d)** devote sufficient time to the educational program to fulfill
431 their supervisory and teaching responsibilities; ^(Core)
432

433 **II.B.2.e)** administer and maintain an educational environment
434 conducive to educating fellows; ^(Core)
435

436 **II.B.2.f)** regularly participate in organized clinical discussions,
437 rounds, journal clubs, and conferences; and, ^(Core)
438

439 **II.B.2.g)** pursue faculty development designed to enhance their skills
440 at least annually. ^(Core)
441

Background and Intent: Faculty development is intended to describe structured programming developed for the purpose of enhancing transference of knowledge, skill, and behavior from the educator to the learner. Faculty development may occur in a variety of configurations (lecture, workshop, etc.) using internal and/or external resources. Programming is typically needs-based (individual or group) and may be specific to the institution or the program. Faculty development programming is to be reported for the fellowship program faculty in the aggregate.

460

II.B.3. Faculty Qualifications

II.B.3.a) Faculty members must have appropriate qualifications in their field and hold appropriate institutional appointments.
(Core)

II.B.3.b) Subspecialty physician faculty members must:

II.B.3.b).(1) have current certification in the subspecialty by the American Board of Internal Medicine or the American Osteopathic Board of Internal Medicine, or possess qualifications judged acceptable to the Review Committee. (Core)

II.B.3.c) Any non-physician faculty members who participate in fellowship program education must be approved by the program director. (Core)

Background and Intent: The provision of optimal and safe patient care requires a team approach. The education of fellows by non-physician educators enables the fellows to better manage patient care and provides valuable advancement of the fellows' knowledge. Furthermore, other individuals contribute to the education of the fellow in the basic science of the subspecialty or in research methodology. If the program director determines that the contribution of a non-physician individual is significant to the education of the fellow, the program director may designate the individual as a program faculty member or a program core faculty member.

461
462
463

467
468
469
470
471
472
473
474
475
476

II.B.3.d) Any other specialty physician faculty members must have current certification in their specialty by the appropriate American Board of Medical Specialties (ABMS) member board or American Osteopathic Association (AOA) certifying board, or possess qualifications judged acceptable to the Review Committee. (Core)

II.B.4. Core Faculty

Core faculty members must have a significant role in the education and supervision of fellows and must devote a significant portion of their entire effort to fellow education and/or administration, and must, as a component of their activities, teach, evaluate, and provide formative feedback to fellows. (Core)

Background and Intent: Core faculty members are critical to the success of fellow education. They support the program leadership in developing, implementing, and assessing curriculum, mentoring fellows, and assessing fellows' progress toward achievement of competence in and the independent practice of the specialty. Core faculty members should be selected for their broad knowledge of and involvement in the program, permitting them to effectively evaluate the program. Core faculty members may also be selected for their specific expertise and unique contribution to the program. Core faculty members are engaged in a broad range of activities, which may vary across programs and specialties. Core faculty members provide clinical teaching and supervision of fellows, and also participate in non-clinical activities related to fellow education and program administration. Examples of these non-clinical activities include, but are not limited to, interviewing and selecting fellow applicants, providing didactic instruction, mentoring fellows, simulation exercises, completing the annual ACGME Faculty Survey, and participating on the program's Clinical Competency Committee, Program Evaluation Committee, and other GME committees.

- 477
 478 **II.B.4.a) Core faculty members must be designated by the program**
 479 **director. (Core)**
 480
 481 **II.B.4.b) Core faculty members must complete the annual ACGME**
 482 **Faculty Survey. (Core)**
 483
 484 **II.B.4.c)** In addition to the program director, there must be at least three
 485 core faculty members certified in cardiovascular disease by the
 486 ABIM or the AOBIM. (Core)
 487
 488 **II.B.4.d)** In programs approved for more than six fellows, there must be at
 489 least one core faculty member certified in cardiovascular disease
 490 by the ABIM or the AOBIM for every 1.5 fellows. (Core)
 491
 492 **II.B.4.e)** ~~One of the subspecialty certified core faculty members must be~~
 493 ~~appointed as associate program director to assist the program~~
 494 ~~director with the administrative and clinical oversight of the~~
 495 ~~program. (Core) At a minimum, the required core faculty members,~~
 496 ~~in aggregate and excluding members of the program leadership,~~
 497 ~~must be provided with support equal to an average dedicated~~
 498 ~~minimum of .1 FTE for educational and administrative~~
 499 ~~responsibilities that do not involve direct patient care. (Core)~~
 500

~~Specialty Background and Intent: The program must have a minimum number of ABIM- or AOBIM-certified cardiovascular disease faculty members who devote significant time to teaching, supervising, and advising residents, and working closely with the program director and associate program director. One way the cardiovascular disease-certified faculty members can demonstrate they are devoting a significant portion of their effort to resident education is by dedicating an average of 10 hours per week to the program.~~

~~Subspecialty-Specific Background and Intent: For instance, a program with an approved complement of 12 fellows is required to have a minimum of eight ABIM- or AOBIM- subspecialty-certified faculty members and an FTE of 10 percent each. Because an associate program director is also a core faculty member, the minimum dedicated time requirements for associate program directors are inclusive of core faculty activities. An additional 10 percent~~

FTE for the core faculty position is not required. For example, if one core faculty member is named the associate program director for a 12-fellow program, the required minimum support for that position is 14 percent FTE.

II.C. Program Coordinator

II.C.1. There must be a program coordinator. (Core)

II.C.2. The program coordinator must be provided with dedicated time and support adequate for administration of the program based upon its size and configuration. (Core)

II.C.2.a) At a minimum, the program coordinator must be provided with the dedicated time and support specified below for administration of the program. Additional administrative support must be provided based on the program size as follows: (Core)

<u>Number of Approved Fellow Positions</u>	<u>Minimum FTE Required for Coordinator Support</u>	<u>Additional Aggregate FTE Required for Administration of the Program</u>
<u>1-3</u>	<u>.3</u>	<u>0</u>
<u>4-6</u>	<u>.3</u>	<u>.2</u>
<u>7-9</u>	<u>.3</u>	<u>.38</u>
<u>10-12</u>	<u>.3</u>	<u>.44</u>
<u>13-15</u>	<u>.3</u>	<u>.50</u>
<u>16-18</u>	<u>.3</u>	<u>.56</u>
<u>19-21</u>	<u>.3</u>	<u>.62</u>
<u>22-24</u>	<u>.3</u>	<u>.68</u>
<u>25-27</u>	<u>.3</u>	<u>.74</u>
<u>28-30</u>	<u>.3</u>	<u>.80</u>
<u>31-33</u>	<u>.3</u>	<u>.86</u>
<u>34-36</u>	<u>.3</u>	<u>.92</u>
<u>37-39</u>	<u>.3</u>	<u>.98</u>
<u>40-42</u>	<u>.3</u>	<u>1.04</u>
<u>43-45</u>	<u>.3</u>	<u>1.10</u>
<u>46-48</u>	<u>.3</u>	<u>1.16</u>

515

Background and Intent: The requirement does not address the source of funding required to provide the specified salary support.

Each program requires a lead administrative person, frequently referred to as a program coordinator, administrator, or as otherwise titled by the institution. This person will frequently manage the day-to-day operations of the program and serve as an important liaison and facilitator between the learners, faculty and other staff members, and the ACGME. Individuals serving in this role are recognized as program coordinators by the ACGME.

The program coordinator is a key member of the leadership team and is critical to the success of the program. As such, the program coordinator must possess skills in

leadership and personnel management appropriate to the complexity of the program. Program coordinators are expected to develop in-depth knowledge of the ACGME and Program Requirements, including policies and procedures. Program coordinators assist the program director in meeting accreditation requirements, educational programming, and support of fellows.

Programs, in partnership with their Sponsoring Institutions, should encourage the professional development of their program coordinators and avail them of opportunities for both professional and personal growth. Programs with fewer fellows may not require a full-time coordinator; one coordinator may support more than one program.

516

Subspecialty-Specific Background and Intent: For instance, a program with an approved complement of 12 fellows is required to have at least 74 percent FTE administrative support: 30 percent FTE for the program coordinator; and an additional 44 percent FTE aggregate support. This additional support may be for the program coordinator only or divided among the program coordinator and one or more other administrative personnel. The Review Committee has not specified how the FTE should be distributed to allow programs, in partnership with their Sponsoring Institution, to allocate the FTE as they see fit.

517 **II.D. Other Program Personnel**

518

519

520

521

522

The program, in partnership with its Sponsoring Institution, must jointly ensure the availability of necessary personnel for the effective administration of the program. ^(Core)

Background and Intent: Multiple personnel may be required to effectively administer a program. These may include staff members with clerical skills, project managers, education experts, and staff members to maintain electronic communication for the program. These personnel may support more than one program in more than one discipline.

523

524 II.D.1.

525

526

527

There must be services available from other health care professionals, including dietitians, language interpreters, nurses, occupational therapists, physical therapists, and social workers. ^(Detail)

528 II.D.2.

529

530

There must be appropriate and timely consultation from other specialties. ^(Detail)

531 **III. Fellow Appointments**

532

533 **III.A. Eligibility Criteria**

534

535 **III.A.1. Eligibility Requirements – Fellowship Programs**

536

537

538

539

540

541

542

All required clinical education for entry into ACGME-accredited fellowship programs must be completed in an ACGME-accredited residency program, an AOA-approved residency program, a program with ACGME International (ACGME-I) Advanced Specialty Accreditation, or a Royal College of Physicians and Surgeons of Canada (RCPSC)-accredited or College of Family Physicians of

543
544
545

Canada (CFPC)-accredited residency program located in Canada.
(Core)

Background and Intent: Eligibility for ABMS or AOA Board certification may not be satisfied by fellowship training. Applicants must be notified of this at the time of application, as required in II.A.4.a).(9).

587
588
589

- III.A.1.a) Fellowship programs must receive verification of each entering fellow’s level of competence in the required field, upon matriculation, using ACGME, ACGME-I, or CanMEDS Milestones evaluations from the core residency program.** (Core)
- III.A.1.b) Prior to appointment in the fellowship, fellows should have completed an internal medicine program that satisfies the requirements in III.A.1.** (Core)
- III.A.1.b).(1) Fellows who did not complete an internal medicine program that satisfies the requirements in III.A.1. must have completed at least three years of internal medicine education prior to starting the fellowship as well as met all of the criteria in the “Fellow Eligibility Exception” section below.** (Core)
- III.A.1.c) Fellow Eligibility Exception**
- The Review Committee for Internal Medicine will allow the following exception to the fellowship eligibility requirements:**
- III.A.1.c).(1) An ACGME-accredited fellowship program may accept an exceptionally qualified international graduate applicant who does not satisfy the eligibility requirements listed in III.A.1., but who does meet all of the following additional qualifications and conditions:** (Core)
- III.A.1.c).(1).(a) evaluation by the program director and fellowship selection committee of the applicant’s suitability to enter the program, based on prior training and review of the summative evaluations of training in the core specialty; and,** (Core)
- III.A.1.c).(1).(b) review and approval of the applicant’s exceptional qualifications by the GMEC; and,** (Core)
- III.A.1.c).(1).(c) verification of Educational Commission for Foreign Medical Graduates (ECFMG) certification.** (Core)

590 III.A.1.c).(2) Applicants accepted through this exception must have
591 an evaluation of their performance by the Clinical
592 Competency Committee within 12 weeks of
593 matriculation. ^(Core)
594

Background and Intent: An exceptionally qualified international graduate applicant has (1) completed a residency program in the core specialty outside the continental United States that was not accredited by the ACGME, AOA, ACGME-I, RCPSC or CFPC, and (2) demonstrated clinical excellence, in comparison to peers, throughout training. Additional evidence of exceptional qualifications is required, which may include one of the following: (a) participation in additional clinical or research training in the specialty or subspecialty; (b) demonstrated scholarship in the specialty or subspecialty; and/or (c) demonstrated leadership during or after residency. Applicants being considered for these positions must be informed of the fact that their training may not lead to certification by ABMS member boards or AOA certifying boards.

In recognition of the diversity of medical education and training around the world, this early evaluation of clinical competence required for these applicants ensures they can provide quality and safe patient care. Any gaps in competence should be addressed as per policies for fellows already established by the program in partnership with the Sponsoring Institution.

595
596 III.B. The program director must not appoint more fellows than approved by the
597 Review Committee. ^(Core)
598

599 III.B.1. All complement increases must be approved by the Review
600 Committee. ^(Core)
601

602 III.B.2. The number of available fellow positions in the program must be at least
603 one per year. ^(Detail)
604

605 III.C. Fellow Transfers
606

607 The program must obtain verification of previous educational experiences
608 and a summative competency-based performance evaluation prior to
609 acceptance of a transferring fellow, and Milestones evaluations upon
610 matriculation. ^(Core)
611

612 IV. Educational Program
613

614 *The ACGME accreditation system is designed to encourage excellence and*
615 *innovation in graduate medical education regardless of the organizational*
616 *affiliation, size, or location of the program.*
617

618 *The educational program must support the development of knowledgeable, skillful*
619 *physicians who provide compassionate care.*
620

621 *In addition, the program is expected to define its specific program aims consistent*
622 *with the overall mission of its Sponsoring Institution, the needs of the community*
623 *it serves and that its graduates will serve, and the distinctive capabilities of*
624 *physicians it intends to graduate. While programs must demonstrate substantial*

625 *compliance with the Common and subspecialty-specific Program Requirements, it*
626 *is recognized that within this framework, programs may place different emphasis*
627 *on research, leadership, public health, etc. It is expected that the program aims*
628 *will reflect the nuanced program-specific goals for it and its graduates; for*
629 *example, it is expected that a program aiming to prepare physician-scientists will*
630 *have a different curriculum from one focusing on community health.*

631
632 **IV.A. The curriculum must contain the following educational components:** ^(Core)

633
634 **IV.A.1. a set of program aims consistent with the Sponsoring Institution’s**
635 **mission, the needs of the community it serves, and the desired**
636 **distinctive capabilities of its graduates;** ^(Core)

637
638 **IV.A.1.a) The program’s aims must be made available to program**
639 **applicants, fellows, and faculty members.** ^(Core)

640
641 **IV.A.2. competency-based goals and objectives for each educational**
642 **experience designed to promote progress on a trajectory to**
643 **autonomous practice in their subspecialty. These must be**
644 **distributed, reviewed, and available to fellows and faculty members;**
645 ^(Core)

646
647 **IV.A.3. delineation of fellow responsibilities for patient care, progressive**
648 **responsibility for patient management, and graded supervision in**
649 **their subspecialty;** ^(Core)

650
Background and Intent: These responsibilities may generally be described by PGY level and specifically by Milestones progress as determined by the Clinical Competency Committee. This approach encourages the transition to competency-based education. An advanced learner may be granted more responsibility independent of PGY level and a learner needing more time to accomplish a certain task may do so in a focused rather than global manner.

651
652 **IV.A.4. structured educational activities beyond direct patient care; and,**
653 ^(Core)

654
Background and Intent: Patient care-related educational activities, such as morbidity and mortality conferences, tumor boards, surgical planning conferences, case discussions, etc., allow fellows to gain medical knowledge directly applicable to the patients they serve. Programs should define those educational activities in which fellows are expected to participate and for which time is protected. Further specification can be found in IV.C.

655
656 **IV.A.5. advancement of fellows’ knowledge of ethical principles**
657 **foundational to medical professionalism.** ^(Core)

658
659 **IV.B. ACGME Competencies**

660
Background and Intent: The Competencies provide a conceptual framework describing the required domains for a trusted physician to enter autonomous practice. These

Competencies are core to the practice of all physicians, although the specifics are further defined by each subspecialty. The developmental trajectories in each of the Competencies are articulated through the Milestones for each subspecialty. The focus in fellowship is on subspecialty-specific patient care and medical knowledge, as well as refining the other competencies acquired in residency.

661
662
663
664
665
666
667
668
669
670
671

IV.B.1. The program must integrate the following ACGME Competencies into the curriculum: (Core)

IV.B.1.a) Professionalism

Fellows must demonstrate a commitment to professionalism and an adherence to ethical principles. (Core)

IV.B.1.b) Patient Care and Procedural Skills

Background and Intent: Quality patient care is safe, effective, timely, efficient, patient-centered, equitable, and designed to improve population health, while reducing per capita costs. (See the Institute of Medicine [IOM]'s *Crossing the Quality Chasm: A New Health System for the 21st Century*, 2001 and Berwick D, Nolan T, Whittington J. *The Triple Aim: care, cost, and quality. Health Affairs*. 2008; 27(3):759-769.). In addition, there should be a focus on improving the clinician's well-being as a means to improve patient care and reduce burnout among residents, fellows, and practicing physicians.

These organizing principles inform the Common Program Requirements across all Competency domains. Specific content is determined by the Review Committees with input from the appropriate professional societies, certifying boards, and the community.

861 **IV.B.1.d)**

Practice-based Learning and Improvement

Fellows must demonstrate the ability to investigate and evaluate their care of patients, to appraise and assimilate scientific evidence, and to continuously improve patient care based on constant self-evaluation and lifelong learning. ^(Core)

Background and Intent: Practice-based learning and improvement is one of the defining characteristics of being a physician. It is the ability to investigate and evaluate the care of patients, to appraise and assimilate scientific evidence, and to continuously improve patient care based on constant self-evaluation and lifelong learning.

The intention of this Competency is to help a fellow refine the habits of mind required to continuously pursue quality improvement, well past the completion of fellowship.

- 868
 869 **IV.B.1.e)** **Interpersonal and Communication Skills**
 870
 871 **Fellows must demonstrate interpersonal and communication**
 872 **skills that result in the effective exchange of information and**
 873 **collaboration with patients, their families, and health**
 874 **professionals. ^(Core)**
 875

876 **IV.B.1.f)**

Systems-based Practice

Fellows must demonstrate an awareness of and responsiveness to the larger context and system of health care, including the social determinants of health, as well as the ability to call effectively on other resources to provide optimal health care. ^(Core)

884 **IV.C.**

Curriculum Organization and Fellow Experiences

886 **IV.C.1.**

The curriculum must be structured to optimize fellow educational experiences, the length of these experiences, and supervisory continuity. ^(Core)

890 **IV.C.1.a)**

Assignment of rotations must be structured to minimize the frequency of rotational transitions, and rotations must be of

892		sufficient length to provide a quality educational experience,
893		defined by continuity of patient care, ongoing supervision,
894		longitudinal relationships with faculty members, and meaningful
895		assessment and feedback. ^(Core)
896		
897	IV.C.1.b)	Clinical experiences should be structured to facilitate learning in a
898		manner that allows fellows to function as part of an effective
899		interprofessional team that works together towards the shared
900		goals of patient safety and quality improvement. ^(Core)
901		
902	IV.C.2.	The program must provide instruction and experience in pain
903		management if applicable for the subspecialty, including recognition
904		of the signs of addiction. ^(Core)
905		
906	IV.C.3.	A minimum time must be spent in the following areas: ^(Core)
907		
908	IV.C.3.a)	24 months of clinical experience, including inpatient and special
909		experiences; ^(Core)
910		
911	IV.C.3.b)	four months in the cardiac catheterization laboratory; ^(Core)
912		
913	IV.C.3.c)	six months in noninvasive cardiac evaluations, consisting of the
914		following: ^(Core)
915		
916	IV.C.3.c).(1)	three months of echocardiography and Doppler; ^(Core)
917		
918	IV.C.3.c).(2)	two months of nuclear cardiology, to include the fellow's
919		active participation in daily nuclear cardiology study
920		interpretation (a minimum of 80 hours) during the rotation;
921		^(Core)
922		
923	IV.C.3.c).(3)	one month of experiences in other noninvasive cardiac
924		evaluations, to include exercise stress testing; ECG
925		interpretation; and ambulatory ECG monitoring (continuous
926		and event recording). This rotation may be done
927		concurrently with other rotations. ^(Core)
928		
929	IV.C.3.c).(4)	experience in cardiac tomography, positron emission
930		tomography, cardiac magnetic resonance imaging, and,
931		peripheral vascular imaging. These rotations may be done
932		concurrently with other rotations. ^(Detail)
933		
934	IV.C.3.d)	two months devoted to electrophysiology; and, ^(Core)
935		
936	IV.C.3.e)	nine months of non-laboratory clinical practice activities. ^(Core)
937		
938	IV.C.4.	Fellows must participate in training using simulation. ^(Detail)
939		
940	IV.C.5.	Experience with Continuity Ambulatory Patients
941		
942	IV.C.5.a)	Fellows must have continuity ambulatory clinic experience that

943		exposes them to the breadth and depth of the subspecialty. ^(Core)
944		
945	IV.C.5.b)	This experience should average one half-day each week. ^(Detail)
946		
947	IV.C.5.c)	This experience must include an appropriate distribution of
948		patients of each gender and a diversity of ages, ^(Core)
949		
950		This should be accomplished through either:
951		
952	IV.C.5.c).(1)	a continuity clinic which provides fellows the opportunity to
953		observe and learn the course of disease; or, ^(Detail)
954		
955	IV.C.5.c).(2)	selected blocks of at least six months which address
956		specific areas of cardiovascular disease. ^(Detail)
957		
958	IV.C.5.d)	Each fellow should, on average, be responsible for four to eight
959		patients during each half-day session. ^(Detail)
960		
961	IV.C.5.e)	The continuity patient care experience should not be interrupted
962		by more than one month, excluding a fellow's vacation. ^(Detail)
963		
964	IV.C.5.f)	Fellows should be informed of the status of their continuity
965		patients when such patients are hospitalized, as clinically
966		appropriate. ^(Detail)
967		
968	IV.C.6.	Procedures and Technical Skills
969		
970	IV.C.6.a)	Direct supervision of procedures performed by each fellow must
971		occur until proficiency has been acquired and documented by the
972		program director. ^(Core)
973		
974	IV.C.6.b)	Faculty members must teach and supervise the fellows in the
975		performance and interpretation of procedures, which must be
976		documented in each fellow's record, including indications,
977		outcomes, diagnoses, and supervisor(s). ^(Core)
978		
979	IV.C.6.c)	Fellows must have formal instruction and clinical experience to the
980		performance of the following:
981		
982	IV.C.6.c).(1)	CT; ^(Core)
983		
984	IV.C.6.c).(2)	intra-aortic balloon counterpulsation; ^(Core)
985		
986	IV.C.6.c).(3)	intracardiac electrophysiologic studies; ^(Core)
987		
988	IV.C.6.c).(4)	MRI; ^(Core)
989		
990	IV.C.6.c).(5)	percutaneous transluminal coronary angioplasty and other
991		interventional procedures; and, ^(Core)
992		
993	IV.C.6.c).(6)	pericardiocentesis. ^(Core)

- 994
995 IV.C.7. The core curriculum must include a didactic program based upon the core
996 knowledge content in the subspecialty area. ^(Core)
997
- 998 IV.C.7.a) The program must afford each fellow an opportunity to review
999 topics covered in conferences that he or she was unable to attend.
1000 ^(Detail)
1001
- 1002 IV.C.7.b) Fellows must participate in clinical case conferences, journal
1003 clubs, research conferences, and morbidity and mortality or quality
1004 improvement conferences. ^(Detail)
1005
- 1006 IV.C.7.c) All core conferences must have at least one faculty member
1007 present, and must be scheduled as to ensure peer-peer and peer-
1008 faculty interaction. ^(Detail)
1009
- 1010 IV.C.8. Patient-based teaching must include direct interaction between fellows
1011 and faculty members, bedside teaching, discussion of pathophysiology,
1012 and the use of current evidence in diagnostic and therapeutic decisions.
1013 ^(Core)
1014
- 1015 The teaching must be:
1016
- 1017 IV.C.8.a) formally conducted on all inpatient, outpatient, and consultative
1018 services; and, ^(Detail)
1019
- 1020 IV.C.8.b) conducted with a frequency and duration that ensures a
1021 meaningful and continuous teaching relationship between the
1022 assigned supervising faculty member(s) and fellows. ^(Detail)
1023
- 1024 IV.C.9. Fellows must receive instruction in practice management relevant to
1025 cardiovascular disease. ^(Detail)

1046
1047 **IV.D.1. Program Responsibilities**

1048
1049 **IV.D.1.a) The program must demonstrate evidence of scholarly**
1050 **activities, consistent with its mission(s) and aims. ^(Core)**

1051
1052 **IV.D.1.b) The program in partnership with its Sponsoring Institution,**
1053 **must allocate adequate resources to facilitate fellow and**
1054 **faculty involvement in scholarly activities. ^(Core)**

1055
1056 **IV.D.2. Faculty Scholarly Activity**

1057
1058 **IV.D.2.a) Among their scholarly activity, programs must demonstrate**
1059 **accomplishments in at least three of the following domains:**
1060 **^(Core)**

- 1061
- 1062 • Research in basic science, education, translational
 - 1063 science, patient care, or population health
 - 1064 • Peer-reviewed grants
 - 1065 • Quality improvement and/or patient safety initiatives
 - 1066 • Systematic reviews, meta-analyses, review articles,
 - 1067 chapters in medical textbooks, or case reports
 - 1068 • Creation of curricula, evaluation tools, didactic
 - 1069 educational activities, or electronic educational
 - 1070 materials
 - 1071 • Contribution to professional committees, educational
 - 1072 organizations, or editorial boards
 - 1073 • Innovations in education

1074
1075 **IV.D.2.b) The program must demonstrate dissemination of scholarly**
1076 **activity within and external to the program by the following**
1077 **methods:**

Background and Intent: For the purposes of education, metrics of scholarly activity represent one of the surrogates for the program's effectiveness in the creation of an environment of inquiry that advances the fellows' scholarly approach to patient care. The Review Committee will evaluate the dissemination of scholarship for the program as a whole, not for individual faculty members, for a five-year interval, for both core and non-core faculty members, with the goal of assessing the effectiveness of the creation of such an environment. The ACGME recognizes that there may be differences in scholarship requirements between different specialties and between residencies and fellowships in the same specialty.

1079
1080 **IV.D.2.b).(1) faculty participation in grand rounds, posters,**
1081 **workshops, quality improvement presentations,**
1082 **podium presentations, grant leadership, non-peer-**
1083 **reviewed print/electronic resources, articles or**
1084 **publications, book chapters, textbooks, webinars,**

1085 **service on professional committees, or serving as a**
1086 **journal reviewer, journal editorial board member, or**
1087 **editor.** (Outcome)‡

1088
1089 IV.D.2.b).(1).(a)

At least 50 percent of the core faculty members who are certified in cardiovascular disease by the ABIM or AOBIM (see Program Requirements II.B.4.c)-d) must annually engage in a variety of scholarly activities, as listed in Program Requirement IV.D.2.b).(1). (Core)

1095
1096 **IV.D.3. Fellow Scholarly Activity**

1097
1098 IV.D.3.a)

While in the program, at least 50 percent of a program's fellows must engage in more than one of the following scholarly activities: participation in grand rounds, posters, workshops, quality improvement presentations, podium presentations, grant leadership, non-peer-reviewed print/electronic resources, articles or publications, book chapters, textbooks, webinars, service on professional committees, or serving as a journal reviewer, journal editorial board member, or editor. (Outcome)

1106
1107 **V. Evaluation**

1108
1109 **V.A. Fellow Evaluation**

1110
1111 **V.A.1. Feedback and Evaluation**

1112

Background and Intent: Feedback is ongoing information provided regarding aspects of one's performance, knowledge, or understanding. The faculty empower fellows to provide much of that feedback themselves in a spirit of continuous learning and self-reflection. Feedback from faculty members in the context of routine clinical care should be frequent, and need not always be formally documented.

Formative and summative evaluation have distinct definitions. Formative evaluation is *monitoring fellow learning* and providing ongoing feedback that can be used by fellows to improve their learning in the context of provision of patient care or other educational opportunities. More specifically, formative evaluations help:

- **fellows identify their strengths and weaknesses and target areas that need work**
- **program directors and faculty members recognize where fellows are struggling and address problems immediately**

Summative evaluation is *evaluating a fellow's learning* by comparing the fellows against the goals and objectives of the rotation and program, respectively. Summative evaluation is utilized to make decisions about promotion to the next level of training, or program completion.

End-of-rotation and end-of-year evaluations have both summative and formative components. Information from a summative evaluation can be used formatively when fellows or faculty members use it to guide their efforts and activities in subsequent rotations and to successfully complete the fellowship program.

Feedback, formative evaluation, and summative evaluation compare intentions with accomplishments, enabling the transformation of a new specialist to one with growing subspecialty expertise.

1113
1114
1115
1116
1117

V.A.1.a) Faculty members must directly observe, evaluate, and frequently provide feedback on fellow performance during each rotation or similar educational assignment. ^(Core)

Background and Intent: Faculty members should provide feedback frequently throughout the course of each rotation. Fellows require feedback from faculty members to reinforce well-performed duties and tasks, as well as to correct deficiencies. This feedback will allow for the development of the learner as they strive to achieve the Milestones. More frequent feedback is strongly encouraged for fellows who have deficiencies that may result in a poor final rotation evaluation.

1145
1146
1147
1148
1149
1150

V.A.1.a).(1) The faculty must discuss this evaluation with each fellow at the completion of each assignment. ^(Core)

V.A.1.a).(2) Assessment of procedural competence should include a formal evaluation process and not be based solely on a minimum number of procedures performed. ^(Detail)

V.A.1.b) Evaluation must be documented at the completion of the assignment. ^(Core)

V.A.1.b).(1) For block rotations of greater than three months in duration, evaluation must be documented at least every three months. ^(Core)

V.A.1.b).(2) Longitudinal experiences such as continuity clinic in the context of other clinical responsibilities must be evaluated at least every three months and at completion. ^(Core)

V.A.1.c) The program must provide an objective performance evaluation based on the Competencies and the subspecialty-specific Milestones, and must: ^(Core)

V.A.1.c).(1) use multiple evaluators (e.g., faculty members, peers, patients, self, and other professional staff members); and, ^(Core)

V.A.1.c).(2) provide that information to the Clinical Competency Committee for its synthesis of progressive fellow performance and improvement toward unsupervised practice. ^(Core)

Background and Intent: The trajectory to autonomous practice in a subspecialty is documented by the subspecialty-specific Milestones evaluation during fellowship.

These Milestones detail the progress of a fellow in attaining skill in each competency domain. It is expected that the most growth in fellowship education occurs in patient care and medical knowledge, while the other four domains of competency must be ensured in the context of the subspecialty. They are developed by a subspecialty group and allow evaluation based on observable behaviors. The Milestones are considered formative and should be used to identify learning needs. This may lead to focused or general curricular revision in any given program or to individualized learning plans for any specific fellow.

- 1151
 1152 **V.A.1.d)** The program director or their designee, with input from the
 1153 Clinical Competency Committee, must:
 1154
 1155 **V.A.1.d).(1)** meet with and review with each fellow their
 1156 documented semi-annual evaluation of performance,
 1157 including progress along the subspecialty-specific
 1158 Milestones. ^(Core)
 1159
 1160 **V.A.1.d).(2)** assist fellows in developing individualized learning
 1161 plans to capitalize on their strengths and identify areas
 1162 for growth; and, ^(Core)
 1163
 1164 **V.A.1.d).(3)** develop plans for fellows failing to progress, following
 1165 institutional policies and procedures. ^(Core)
 1166

Background and Intent: Learning is an active process that requires effort from the teacher and the learner. Faculty members evaluate a fellow's performance at least at the end of each rotation. The program director or their designee will review those evaluations, including their progress on the Milestones, at a minimum of every six months. Fellows should be encouraged to reflect upon the evaluation, using the information to reinforce well-performed tasks or knowledge or to modify deficiencies in knowledge or practice. Working together with the faculty members, fellows should develop an individualized learning plan.

Fellows who are experiencing difficulties with achieving progress along the Milestones may require intervention to address specific deficiencies. Such intervention, documented in an individual remediation plan developed by the program director or a faculty mentor and the fellow, will take a variety of forms based on the specific learning needs of the fellow. However, the ACGME recognizes that there are situations which require more significant intervention that may alter the time course of fellow progression. To ensure due process, it is essential that the program director follow institutional policies and procedures.

- 1167
 1168 **V.A.1.e)** At least annually, there must be a summative evaluation of
 1169 each fellow that includes their readiness to progress to the
 1170 next year of the program, if applicable. ^(Core)
 1171
 1172 **V.A.1.f)** The evaluations of a fellow's performance must be accessible
 1173 for review by the fellow. ^(Core)
 1174
 1175 **V.A.2.** Final Evaluation
 1176

1177	V.A.2.a)	The program director must provide a final evaluation for each fellow upon completion of the program. ^(Core)
1178		
1179		
1180	V.A.2.a).(1)	The subspecialty-specific Milestones, and when applicable the subspecialty-specific Case Logs, must be used as tools to ensure fellows are able to engage in autonomous practice upon completion of the program. ^(Core)

1207		
1208		
1209		
1210		
1211		
1212		
1213	V.A.3.b)	The Clinical Competency Committee must:
1214		
1215	V.A.3.b).(1)	review all fellow evaluations at least semi-annually; ^(Core)
1216		
1217		
1218	V.A.3.b).(2)	determine each fellow’s progress on achievement of the subspecialty-specific Milestones; and, ^(Core)
1219		
1220		
1221	V.A.3.b).(3)	meet prior to the fellows’ semi-annual evaluations and advise the program director regarding each fellow’s progress. ^(Core)
1222		
1223		
1224		
1225	V.B.	Faculty Evaluation
1226		

1227 **V.B.1.** The program must have a process to evaluate each faculty
1228 member's performance as it relates to the educational program at
1229 least annually. ^(Core)
1230

Background and Intent: The program director is responsible for the education program and for whom delivers it. While the term faculty may be applied to physicians within a given institution for other reasons, it is applied to fellowship program faculty members only through approval by a program director. The development of the faculty improves the education, clinical, and research aspects of a program. Faculty members have a strong commitment to the fellow and desire to provide optimal education and work opportunities. Faculty members must be provided feedback on their contribution to the mission of the program. All faculty members who interact with fellows desire feedback on their education, clinical care, and research. If a faculty member does not interact with fellows, feedback is not required. With regard to the diverse operating environments and configurations, the fellowship program director may need to work with others to determine the effectiveness of the program's faculty performance with regard to their role in the educational program. All teaching faculty members should have their educational efforts evaluated by the fellows in a confidential and anonymous manner. Other aspects for the feedback may include research or clinical productivity, review of patient outcomes, or peer review of scholarly activity. The process should reflect the local environment and identify the necessary information. The feedback from the various sources should be summarized and provided to the faculty on an annual basis by a member of the leadership team of the program.

1231
1232 **V.B.1.a)** This evaluation must include a review of the faculty member's
1233 clinical teaching abilities, engagement with the educational
1234 program, participation in faculty development related to their
1235 skills as an educator, clinical performance, professionalism,
1236 and scholarly activities. ^(Core)
1237

1238 **V.B.1.b)** This evaluation must include written, confidential evaluations
1239 by the fellows. ^(Core)
1240

1241 **V.B.2.** Faculty members must receive feedback on their evaluations at least
1242 annually. ^(Core)
1243

1244 **V.B.3.** Results of the faculty educational evaluations should be
1245 incorporated into program-wide faculty development plans. ^(Core)
1246

Background and Intent: The quality of the faculty's teaching and clinical care is a determinant of the quality of the program and the quality of the fellows' future clinical care. Therefore, the program has the responsibility to evaluate and improve the program faculty members' teaching, scholarship, professionalism, and quality care. This section mandates annual review of the program's faculty members for this purpose, and can be used as input into the Annual Program Evaluation.

1247
1248 **V.C.** Program Evaluation and Improvement
1249

1250 **V.C.1.** The program director must appoint the Program Evaluation
1251 Committee to conduct and document the Annual Program

- 1252 **Evaluation as part of the program’s continuous improvement**
 1253 **process.** ^(Core)
 1254
 1255 **V.C.1.a)** **The Program Evaluation Committee must be composed of at**
 1256 **least two program faculty members, at least one of whom is a**
 1257 **core faculty member, and at least one fellow.** ^(Core)
 1258
 1259 **V.C.1.b)** **Program Evaluation Committee responsibilities must include:**
 1260
 1261 **V.C.1.b).(1)** **acting as an advisor to the program director, through**
 1262 **program oversight;** ^(Core)
 1263
 1264 **V.C.1.b).(2)** **review of the program’s self-determined goals and**
 1265 **progress toward meeting them;** ^(Core)
 1266
 1267 **V.C.1.b).(3)** **guiding ongoing program improvement, including**
 1268 **development of new goals, based upon outcomes;**
 1269 **and,** ^(Core)
 1270
 1271 **V.C.1.b).(4)** **review of the current operating environment to identify**
 1272 **strengths, challenges, opportunities, and threats as**
 1273 **related to the program’s mission and aims.** ^(Core)
 1274

Background and Intent: In order to achieve its mission and train quality physicians, a program must evaluate its performance and plan for improvement in the Annual Program Evaluation. Performance of fellows and faculty members is a reflection of program quality, and can use metrics that reflect the goals that a program has set for itself. The Program Evaluation Committee utilizes outcome parameters and other data to assess the program’s progress toward achievement of its goals and aims.

- 1275
 1276 **V.C.1.c)** **The Program Evaluation Committee should consider the**
 1277 **following elements in its assessment of the program:**
 1278

1334		
1335	V.C.2.	The program must participate in a Self-Study prior to its 10-Year Accreditation Site Visit. ^(Core)
1336		
1337		
1338	V.C.2.a)	A summary of the Self-Study must be submitted to the DIO. ^(Core)
1339		
1340		

Background and Intent: Outcomes of the documented Annual Program Evaluation can be integrated into the 10-year Self-Study process. The Self-Study is an objective, comprehensive evaluation of the fellowship program, with the aim of improving it. Underlying the Self-Study is this longitudinal evaluation of the program and its learning environment, facilitated through sequential Annual Program Evaluations that focus on the required components, with an emphasis on program strengths and self-identified areas for improvement. Details regarding the timing and expectations for the

Self-Study and the 10-Year Accreditation Site Visit are provided in the *ACGME Manual of Policies and Procedures*. Additionally, a description of the [Self-Study process](#), as well as information on how to prepare for the [10-Year Accreditation Site Visit](#), is available on the ACGME website.

- V.C.3.** *One goal of ACGME-accredited education is to educate physicians who seek and achieve board certification. One measure of the effectiveness of the educational program is the ultimate pass rate.*
- The program director should encourage all eligible program graduates to take the certifying examination offered by the applicable American Board of Medical Specialties (ABMS) member board or American Osteopathic Association (AOA) certifying board.*
- V.C.3.a)** For subspecialties in which the ABMS member board and/or AOA certifying board offer(s) an annual written exam, in the preceding three years, the program’s aggregate pass rate of those taking the examination for the first time must be higher than the bottom fifth percentile of programs in that subspecialty. *(Outcome)*
- V.C.3.b)** For subspecialties in which the ABMS member board and/or AOA certifying board offer(s) a biennial written exam, in the preceding six years, the program’s aggregate pass rate of those taking the examination for the first time must be higher than the bottom fifth percentile of programs in that subspecialty. *(Outcome)*
- V.C.3.c)** For subspecialties in which the ABMS member board and/or AOA certifying board offer(s) an annual oral exam, in the preceding three years, the program’s aggregate pass rate of those taking the examination for the first time must be higher than the bottom fifth percentile of programs in that subspecialty. *(Outcome)*
- V.C.3.d)** For subspecialties in which the ABMS member board and/or AOA certifying board offer(s) a biennial oral exam, in the preceding six years, the program’s aggregate pass rate of those taking the examination for the first time must be higher than the bottom fifth percentile of programs in that subspecialty. *(Outcome)*
- V.C.3.e)** For each of the exams referenced in V.C.3.a)-d), any program whose graduates over the time period specified in the requirement have achieved an 80 percent pass rate will have met this requirement, no matter the percentile rank of the program for pass rate in that subspecialty. *(Outcome)*

Background and Intent: Setting a single standard for pass rate that works across subspecialties is not supportable based on the heterogeneity of the psychometrics of different examinations. By using a percentile rank, the performance of the lower five

percent (fifth percentile) of programs can be identified and set on a path to curricular and test preparation reform.

There are subspecialties where there is a very high board pass rate that could leave successful programs in the bottom five percent (fifth percentile) despite admirable performance. These high-performing programs should not be cited, and V.C.3.e) is designed to address this.

1385
1386
1387
1388
1389

V.C.3.f) Programs must report, in ADS, board certification status annually for the cohort of board-eligible fellows that graduated seven years earlier. ^(Core)

Background and Intent: It is essential that fellowship programs demonstrate knowledge and skill transfer to their fellows. One measure of that is the qualifying or initial certification exam pass rate. Another important parameter of the success of the program is the ultimate board certification rate of its graduates. Graduates are eligible for up to seven years from fellowship graduation for initial certification. The ACGME will calculate a rolling three-year average of the ultimate board certification rate at seven years post-graduation, and the Review Committees will monitor it.

The Review Committees will track the rolling seven-year certification rate as an indicator of program quality. Programs are encouraged to monitor their graduates' performance on board certification examinations.

In the future, the ACGME may establish parameters related to ultimate board certification rates.

VI. The Learning and Working Environment

Fellowship education must occur in the context of a learning and working environment that emphasizes the following principles:

- *Excellence in the safety and quality of care rendered to patients by fellows today*
- *Excellence in the safety and quality of care rendered to patients by today's fellows in their future practice*
- *Excellence in professionalism through faculty modeling of:*
 - *the effacement of self-interest in a humanistic environment that supports the professional development of physicians*
 - *the joy of curiosity, problem-solving, intellectual rigor, and discovery*
- *Commitment to the well-being of the students, residents, fellows, faculty members, and all members of the health care team*

Background and Intent: The revised requirements are intended to provide greater flexibility within an established framework, allowing programs and fellows more

discretion to structure clinical education in a way that best supports the above principles of professional development. With this increased flexibility comes the responsibility for programs and fellows to adhere to the 80-hour maximum weekly limit (unless a rotation-specific exception is granted by a Review Committee), and to utilize flexibility in a manner that optimizes patient safety, fellow education, and fellow well-being. The requirements are intended to support the development of a sense of professionalism by encouraging fellows to make decisions based on patient needs and their own well-being, without fear of jeopardizing their program's accreditation status. In addition, the proposed requirements eliminate the burdensome documentation requirement for fellows to justify clinical and educational work hour variations.

Clinical and educational work hours represent only one part of the larger issue of conditions of the learning and working environment, and Section VI has now been expanded to include greater attention to patient safety and fellow and faculty member well-being. The requirements are intended to support programs and fellows as they strive for excellence, while also ensuring ethical, humanistic training. Ensuring that flexibility is used in an appropriate manner is a shared responsibility of the program and fellows. With this flexibility comes a responsibility for fellows and faculty members to recognize the need to hand off care of a patient to another provider when a fellow is too fatigued to provide safe, high quality care and for programs to ensure that fellows remain within the 80-hour maximum weekly limit.

VI.A. Patient Safety, Quality Improvement, Supervision, and Accountability

VI.A.1. Patient Safety and Quality Improvement

All physicians share responsibility for promoting patient safety and enhancing quality of patient care. Graduate medical education must prepare fellows to provide the highest level of clinical care with continuous focus on the safety, individual needs, and humanity of their patients. It is the right of each patient to be cared for by fellows who are appropriately supervised; possess the requisite knowledge, skills, and abilities; understand the limits of their knowledge and experience; and seek assistance as required to provide optimal patient care.

Fellows must demonstrate the ability to analyze the care they provide, understand their roles within health care teams, and play an active role in system improvement processes. Graduating fellows will apply these skills to critique their future unsupervised practice and effect quality improvement measures.

It is necessary for fellows and faculty members to consistently work in a well-coordinated manner with other health care professionals to achieve organizational patient safety goals.

VI.A.1.a) Patient Safety

1551 VI.A.2.

Supervision and Accountability

1552
1553 VI.A.2.a)

Although the attending physician is ultimately responsible for the care of the patient, every physician shares in the responsibility and accountability for their efforts in the provision of care. Effective programs, in partnership with their Sponsoring Institutions, define, widely communicate, and monitor a structured chain of responsibility and accountability as it relates to the supervision of all patient care.

Supervision in the setting of graduate medical education provides safe and effective care to patients; ensures each fellow's development of the skills, knowledge, and attitudes required to enter the unsupervised practice of medicine; and establishes a foundation for continued professional growth.

1578
1579 VI.A.2.a).(1).(b)

Fellows and faculty members must inform each patient of their respective roles in that patient's care when providing direct patient care. ^(Core)

1580
1581
1582
1583 VI.A.2.b)

Supervision may be exercised through a variety of methods. For many aspects of patient care, the supervising physician may be a more advanced fellow. Other portions of care provided by the fellow can be adequately supervised by the appropriate availability of the supervising faculty member or fellow, either on site or by means of telecommunication technology. Some activities require the physical presence of the supervising faculty member. In some circumstances,

1591
1592
1593

supervision may include post-hoc review of fellow-delivered care with feedback.

Background and Intent: Appropriate supervision is essential for patient safety and high-quality teaching. Supervision is also contextual. There is tremendous diversity of fellow patient interactions, education and training locations, and fellow skills and abilities even at the same level of the educational program. The degree of supervision is expected to evolve progressively as a fellow gains more experience, even with the same patient condition or procedure. All fellows have a level of supervision commensurate with their level of autonomy in practice; this level of supervision may be enhanced based on factors such as patient safety, complexity, acuity, urgency, risk of serious adverse events, or other pertinent variables.

- 1680

1681
1682
1683
1684

VI.B.2.b) be accomplished without excessive reliance on fellows to fulfill non-physician obligations; and, ^(Core)

Background and Intent: Routine reliance on fellows to fulfill non-physician obligations increases work compression for fellows and does not provide an optimal educational experience. Non-physician obligations are those duties which in most institutions are performed by nursing and allied health professionals, transport services, or clerical staff. Examples of such obligations include transport of patients from the wards or units for procedures elsewhere in the hospital; routine blood drawing for laboratory tests; routine monitoring of patients when off the ward; and clerical duties, such as scheduling. While it is understood that fellows may be expected to do any of these things on occasion when the need arises, these activities should not be performed by fellows routinely and must be kept to a minimum to optimize fellow education.

1685
1686
1687

VI.B.2.c) ensure manageable patient care responsibilities. ^(Core)

Background and Intent: The Common Program Requirements do not define “manageable patient care responsibilities” as this is variable by specialty and PGY level. Review Committees will provide further detail regarding patient care responsibilities in the applicable specialty-specific Program Requirements and accompanying FAQs. However, all programs, regardless of specialty, should carefully assess how the assignment of patient care responsibilities can affect work compression.

clinical learning environment models constructive behaviors, and prepares fellows with the skills and attitudes needed to thrive throughout their careers.

Background and Intent: The ACGME is committed to addressing physician well-being for individuals and as it relates to the learning and working environment. The creation of a learning and working environment with a culture of respect and accountability for physician well-being is crucial to physicians' ability to deliver the safest, best possible care to patients. The ACGME is leveraging its resources in four key areas to support the ongoing focus on physician well-being: education, influence, research, and collaboration. Information regarding the ACGME's ongoing efforts in this area is available on the ACGME website: www.acgme.org/physicianwellbeing.

The ACGME also created a repository for well-being materials, assessments, presentations, and more on the [Well-Being Tools and Resources page](#) in Learn at ACGME for programs seeking to develop or strengthen their own well-being initiatives. There are many activities that programs can implement now to assess and support physician well-being. These include the distribution and analysis of culture of safety surveys, ensuring the availability of counseling services, and paying attention to the safety of the entire health care team.

- VI.C.1.** The responsibility of the program, in partnership with the Sponsoring Institution, to address well-being must include:
- VI.C.1.a)** efforts to enhance the meaning that each fellow finds in the experience of being a physician, including protecting time with patients, minimizing non-physician obligations, providing administrative support, promoting progressive autonomy and flexibility, and enhancing professional relationships; ^(Core)
- VI.C.1.b)** attention to scheduling, work intensity, and work compression that impacts fellow well-being; ^(Core)
- VI.C.1.c)** evaluating workplace safety data and addressing the safety of fellows and faculty members; ^(Core)

Background and Intent: This requirement emphasizes the responsibility shared by the Sponsoring Institution and its programs to gather information and utilize systems that monitor and enhance fellow and faculty member safety, including physical safety. Issues to be addressed include, but are not limited to, monitoring of workplace injuries, physical or emotional violence, vehicle collisions, and emotional well-being after adverse events.

1777
1778
1779
1780

- VI.C.1.d)** policies and programs that encourage optimal fellow and faculty member well-being; and, ^(Core)

Background and Intent: Well-being includes having time away from work to engage with family and friends, as well as to attend to personal needs and to one's own health, including adequate rest, healthy diet, and regular exercise.

1781
1782 VI.C.1.d).(1) Fellows must be given the opportunity to attend
1783 medical, mental health, and dental care appointments,
1784 including those scheduled during their working hours.
1785 (Core)
1786

Background and Intent: The intent of this requirement is to ensure that fellows have the opportunity to access medical and dental care, including mental health care, at times that are appropriate to their individual circumstances. Fellows must be provided with time away from the program as needed to access care, including appointments scheduled during their working hours.

1787
1788 VI.C.1.e) attention to fellow and faculty member burnout, depression,
1789 and substance use disorder. The program, in partnership with
1790 its Sponsoring Institution, must educate faculty members and
1791 fellows in identification of the symptoms of burnout,
1792 depression, and substance use disorder, including means to
1793 assist those who experience these conditions. Fellows and
1794 faculty members must also be educated to recognize those
1795 symptoms in themselves and how to seek appropriate care.
1796 The program, in partnership with its Sponsoring Institution,
1797 must: (Core)
1798

Background and Intent: Programs and Sponsoring Institutions are encouraged to review materials in order to create systems for identification of burnout, depression, and substance use disorder. Materials and more information are available in Learn at ACGME (<https://dl.acgme.org/pages/well-being-tools-resources>).

1799
1800 VI.C.1.e).(1) encourage fellows and faculty members to alert the
1801 program director or other designated personnel or
1802 programs when they are concerned that another
1803 fellow, resident, or faculty member may be displaying
1804 signs of burnout, depression, a substance use
1805 disorder, suicidal ideation, or potential for violence;
1806 (Core)
1807

Background and Intent: Individuals experiencing burnout, depression, substance use disorder, and/or suicidal ideation are often reluctant to reach out for help due to the stigma associated with these conditions, and are concerned that seeking help may have a negative impact on their career. Recognizing that physicians are at increased risk in these areas, it is essential that fellows and faculty members are able to report their concerns when another fellow or faculty member displays signs of any of these conditions, so that the program director or other designated personnel, such as the department chair, may assess the situation and intervene as necessary to facilitate access to appropriate care. Fellows and faculty members must know which personnel, in addition to the program director, have been designated with this responsibility; those personnel and the program director should be familiar with the institution's impaired physician policy and any employee health, employee assistance, and/or wellness programs within the institution. In cases of physician impairment, the program director or designated personnel should follow the policies of their institution for reporting.

- 1808
1809 **VI.C.1.e).(2)** provide access to appropriate tools for self-screening;
1810 and, ^(Core)
1811
1812 **VI.C.1.e).(3)** provide access to confidential, affordable mental
1813 health assessment, counseling, and treatment,
1814 including access to urgent and emergent care 24
1815 hours a day, seven days a week. ^(Core)
1816

Background and Intent: The intent of this requirement is to ensure that fellows have immediate access at all times to a mental health professional (psychiatrist, psychologist, Licensed Clinical Social Worker, Primary Mental Health Nurse Practitioner, or Licensed Professional Counselor) for urgent or emergent mental health issues. In-person, telemedicine, or telephonic means may be utilized to satisfy this requirement. Care in the Emergency Department may be necessary in some cases, but not as the primary or sole means to meet the requirement.

The reference to affordable counseling is intended to require that financial cost not be a barrier to obtaining care.

- 1817
1818 **VI.C.2.** There are circumstances in which fellows may be unable to attend
1819 work, including but not limited to fatigue, illness, family
1820 emergencies, and parental leave. Each program must allow an
1821 appropriate length of absence for fellows unable to perform their
1822 patient care responsibilities. ^(Core)
1823
1824 **VI.C.2.a)** The program must have policies and procedures in place to
1825 ensure coverage of patient care. ^(Core)
1826
1827 **VI.C.2.b)** These policies must be implemented without fear of negative
1828 consequences for the fellow who is or was unable to provide
1829 the clinical work. ^(Core)
1830

Background and Intent: Fellows may need to extend their length of training depending on length of absence and specialty board eligibility requirements. Teammates should assist colleagues in need and equitably reintegrate them upon return.

- 1831
1832 **VI.D. Fatigue Mitigation**
1833
1834 **VI.D.1. Programs must:**
1835
1836 **VI.D.1.a)** educate all faculty members and fellows to recognize the
1837 signs of fatigue and sleep deprivation; ^(Core)
1838
1839 **VI.D.1.b)** educate all faculty members and fellows in alertness
1840 management and fatigue mitigation processes; and, ^(Core)
1841
1842 **VI.D.1.c)** encourage fellows to use fatigue mitigation processes to
1843 manage the potential negative effects of fatigue on patient
1844 care and learning. ^(Detail)

1845

Background and Intent: Providing medical care to patients is physically and mentally demanding. Night shifts, even for those who have had enough rest, cause fatigue. Experiencing fatigue in a supervised environment during training prepares fellows for managing fatigue in practice. It is expected that programs adopt fatigue mitigation processes and ensure that there are no negative consequences and/or stigma for using fatigue mitigation strategies.

This requirement emphasizes the importance of adequate rest before and after clinical responsibilities. Strategies that may be used include, but are not limited to, strategic napping; the judicious use of caffeine; availability of other caregivers; time management to maximize sleep off-duty; learning to recognize the signs of fatigue, and self-monitoring performance and/or asking others to monitor performance; remaining active to promote alertness; maintaining a healthy diet; using relaxation techniques to fall asleep; maintaining a consistent sleep routine; exercising regularly; increasing sleep time before and after call; and ensuring sufficient sleep recovery periods.

1846

1847

VI.D.2. Each program must ensure continuity of patient care, consistent with the program’s policies and procedures referenced in VI.C.2–VI.C.2.b), in the event that a fellow may be unable to perform their patient care responsibilities due to excessive fatigue. (Core)

1848

1849

VI.E. Clinical Responsibilities, Teamwork, and Transitions of Care

1857

1858

VI.E.1. Clinical Responsibilities

1859

1860

The clinical responsibilities for each fellow must be based on PGY level, patient safety, fellow ability, severity and complexity of patient illness/condition, and available support services. (Core)

1861

1862

1863

Background and Intent: The changing clinical care environment of medicine has meant that work compression due to high complexity has increased stress on fellows. Faculty members and program directors need to make sure fellows function in an environment that has safe patient care and a sense of fellow well-being. Some Review Committees have addressed this by setting limits on patient admissions, and it is an essential responsibility of the program director to monitor fellow workload. Workload should be distributed among the fellow team and interdisciplinary teams to minimize work compression.

1864

1865

VI.E.2. Teamwork

1866

1867

Fellows must care for patients in an environment that maximizes communication. This must include the opportunity to work as a member of effective interprofessional teams that are appropriate to the delivery of care in the subspecialty and larger health system.

1868

1869

1870

1885 **communicating with team members in the hand-over process.**
1886 **(Outcome)**
1887
1888 **VI.E.3.d) Programs and clinical sites must maintain and communicate**
1889 **schedules of attending physicians and fellows currently**
1890 **responsible for care. (Core)**
1891
1892 **VI.E.3.e) Each program must ensure continuity of patient care,**
1893 **consistent with the program’s policies and procedures**
1894 **referenced in VI.C.2-VI.C.2.b), in the event that a fellow may**
1895 **be unable to perform their patient care responsibilities due to**
1896 **excessive fatigue or illness, or family emergency. (Core)**
1897

1898 **VI.F. Clinical Experience and Education**
1899

Programs, in partnership with their Sponsoring Institutions, must design an effective program structure that is configured to provide fellows with educational and clinical experience opportunities, as well as reasonable opportunities for rest and personal activities.

Background and Intent: In the new requirements, the terms “clinical experience and education,” “clinical and educational work,” and “clinical and educational work hours” replace the terms “duty hours,” “duty periods,” and “duty.” These changes have been made in response to concerns that the previous use of the term “duty” in reference to number of hours worked may have led some to conclude that fellows’ duty to “clock out” on time superseded their duty to their patients.

- 1905
1906 **VI.F.1. Maximum Hours of Clinical and Educational Work per Week**
1907
1908 **Clinical and educational work hours must be limited to no more than**
1909 **80 hours per week, averaged over a four-week period, inclusive of all**
1910 **in-house clinical and educational activities, clinical work done from**
1911 **home, and all moonlighting. (Core)**
1912

Background and Intent: Programs and fellows have a shared responsibility to ensure that the 80-hour maximum weekly limit is not exceeded. While the requirement has been written with the intent of allowing fellows to remain beyond their scheduled work

periods to care for a patient or participate in an educational activity, these additional hours must be accounted for in the allocated 80 hours when averaged over four weeks.

Scheduling

While the ACGME acknowledges that, on rare occasions, a fellow may work in excess of 80 hours in a given week, all programs and fellows utilizing this flexibility will be required to adhere to the 80-hour maximum weekly limit when averaged over a four-week period. Programs that regularly schedule fellows to work 80 hours per week and still permit fellows to remain beyond their scheduled work period are likely to exceed the 80-hour maximum, which would not be in substantial compliance with the requirement. These programs should adjust schedules so that fellows are scheduled to work fewer than 80 hours per week, which would allow fellows to remain beyond their scheduled work period when needed without violating the 80-hour requirement. Programs may wish to consider using night float and/or making adjustments to the frequency of in-house call to ensure compliance with the 80-hour maximum weekly limit.

Oversight

With increased flexibility introduced into the Requirements, programs permitting this flexibility will need to account for the potential for fellows to remain beyond their assigned work periods when developing schedules, to avoid exceeding the 80-hour maximum weekly limit, averaged over four weeks. The ACGME Review Committees will strictly monitor and enforce compliance with the 80-hour requirement. Where violations of the 80-hour requirement are identified, programs will be subject to citation and at risk for an adverse accreditation action.

Work from Home

While the requirement specifies that clinical work done from home must be counted toward the 80-hour maximum weekly limit, the expectation remains that scheduling be structured so that fellows are able to complete most work on site during scheduled clinical work hours without requiring them to take work home. The new requirements acknowledge the changing landscape of medicine, including electronic health records, and the resulting increase in the amount of work fellows choose to do from home. The requirement provides flexibility for fellows to do this while ensuring that the time spent by fellows completing clinical work from home is accomplished within the 80-hour weekly maximum. Types of work from home that must be counted include using an electronic health record and taking calls from home. Reading done in preparation for the following day's cases, studying, and research done from home do not count toward the 80 hours. Fellow decisions to leave the hospital before their clinical work has been completed and to finish that work later from home should be made in consultation with the fellow's supervisor. In such circumstances, fellows should be mindful of their professional responsibility to complete work in a timely manner and to maintain patient confidentiality.

During the public comment period many individuals raised questions and concerns related to this change. Some questioned whether minute by minute tracking would be required; in other words, if a fellow spends three minutes on a phone call and then a few hours later spends two minutes on another call, will the fellow need to report that time. Others raised concerns related to the ability of programs and institutions to verify the accuracy of the information reported by fellows. The new requirements are not an attempt to micromanage this process. Fellows are to track the time they spend on clinical work from home and to report that time to the program. Decisions regarding

whether to report infrequent phone calls of very short duration will be left to the individual fellow. Programs will need to factor in time fellows are spending on clinical work at home when schedules are developed to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks. There is no requirement that programs assume responsibility for documenting this time. Rather, the program's responsibility is ensuring that fellows report their time from home and that schedules are structured to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks.

VI.F.2. Mandatory Time Free of Clinical Work and Education

VI.F.2.a) The program must design an effective program structure that is configured to provide fellows with educational opportunities, as well as reasonable opportunities for rest and personal well-being. ^(Core)

VI.F.2.b) Fellows should have eight hours off between scheduled clinical work and education periods. ^(Detail)

VI.F.2.b).(1) There may be circumstances when fellows choose to stay to care for their patients or return to the hospital with fewer than eight hours free of clinical experience and education. This must occur within the context of the 80-hour and the one-day-off-in-seven requirements. ^(Detail)

Background and Intent: While it is expected that fellow schedules will be structured to ensure that fellows are provided with a minimum of eight hours off between scheduled work periods, it is recognized that fellows may choose to remain beyond their scheduled time, or return to the clinical site during this time-off period, to care for a patient. The requirement preserves the flexibility for fellows to make those choices. It is also noted that the 80-hour weekly limit (averaged over four weeks) is a deterrent for scheduling fewer than eight hours off between clinical and education work periods, as it would be difficult for a program to design a schedule that provides fewer than eight hours off without violating the 80-hour rule.

1931
1932
1933
1934

VI.F.2.c) Fellows must have at least 14 hours free of clinical work and education after 24 hours of in-house call. ^(Core)

Background and Intent: Fellows have a responsibility to return to work rested, and thus are expected to use this time away from work to get adequate rest. In support of this goal, fellows are encouraged to prioritize sleep over other discretionary activities.

1935
1936
1937
1938
1939
1940

VI.F.2.d) Fellows must be scheduled for a minimum of one day in seven free of clinical work and required education (when averaged over four weeks). At-home call cannot be assigned on these free days. ^(Core)

Background and Intent: The requirement provides flexibility for programs to distribute days off in a manner that meets program and fellow needs. It is strongly recommended

that fellows' preference regarding how their days off are distributed be considered as schedules are developed. It is desirable that days off be distributed throughout the month, but some fellows may prefer to group their days off to have a "golden weekend," meaning a consecutive Saturday and Sunday free from work. The requirement for one free day in seven should not be interpreted as precluding a golden weekend. Where feasible, schedules may be designed to provide fellows with a weekend, or two consecutive days, free of work. The applicable Review Committee will evaluate the number of consecutive days of work and determine whether they meet educational objectives. Programs are encouraged to distribute days off in a fashion that optimizes fellow well-being, and educational and personal goals. It is noted that a day off is defined in the ACGME Glossary of Terms as "one (1) continuous 24-hour period free from all administrative, clinical, and educational activities."

- 1941
 1942 **VI.F.3. Maximum Clinical Work and Education Period Length**
 1943
 1944 **VI.F.3.a) Clinical and educational work periods for fellows must not**
 1945 **exceed 24 hours of continuous scheduled clinical**
 1946 **assignments. (Core)**
 1947
 1948 **VI.F.3.a).(1) Up to four hours of additional time may be used for**
 1949 **activities related to patient safety, such as providing**
 1950 **effective transitions of care, and/or fellow education.**
 1951 **(Core)**
 1952
 1953 **VI.F.3.a).(1).(a) Additional patient care responsibilities must not**
 1954 **be assigned to a fellow during this time. (Core)**
 1955

Background and Intent: The additional time referenced in VI.F.3.a).(1) should not be used for the care of new patients. It is essential that the fellow continue to function as a member of the team in an environment where other members of the team can assess fellow fatigue, and that supervision for post-call fellows is provided. This 24 hours and up to an additional four hours must occur within the context of 80-hour weekly limit, averaged over four weeks.

 1970 **VI.F.4.a).(3) to attend unique educational events. (Detail)**
 1971

1972 VI.F.4.b) These additional hours of care or education will be counted
1973 toward the 80-hour weekly limit. ^(Detail)
1974

Background and Intent: This requirement is intended to provide fellows with some control over their schedules by providing the flexibility to voluntarily remain beyond the scheduled responsibilities under the circumstances described above. It is important to note that a fellow may remain to attend a conference, or return for a conference later in the day, only if the decision is made voluntarily. Fellows must not be required to stay. Programs allowing fellows to remain or return beyond the scheduled work and clinical education period must ensure that the decision to remain is initiated by the fellow and that fellows are not coerced. This additional time must be counted toward the 80-hour maximum weekly limit.

1975
1976 VI.F.4.c) A Review Committee may grant rotation-specific exceptions
1977 for up to 10 percent or a maximum of 88 clinical and
1978 educational work hours to individual programs based on a
1979 sound educational rationale.
1980
1981 The Review Committee for Internal Medicine will not consider
1982 requests for exceptions to the 80-hour limit to the fellows' work
1983 week.
1984

1985 VI.F.5. Moonlighting

1986
1987 VI.F.5.a) Moonlighting must not interfere with the ability of the fellow
1988 to achieve the goals and objectives of the educational
1989 program, and must not interfere with the fellow's fitness for
1990 work nor compromise patient safety. ^(Core)
1991

1992 VI.F.5.b) Time spent by fellows in internal and external moonlighting
1993 (as defined in the ACGME Glossary of Terms) must be
1994 counted toward the 80-hour maximum weekly limit. ^(Core)
1995

Background and Intent: For additional clarification of the expectations related to moonlighting, please refer to the Common Program Requirement FAQs (available at <http://www.acgme.org/What-We-Do/Accreditation/Common-Program-Requirements>).

1996
1997 VI.F.6. In-House Night Float
1998
1999 Night float must occur within the context of the 80-hour and one-
2000 day-off-in-seven requirements. ^(Core)
2001

Background and Intent: The requirement for no more than six consecutive nights of night float was removed to provide programs with increased flexibility in scheduling.

2002
2003 VI.F.7. Maximum In-House On-Call Frequency
2004
2005 Fellows must be scheduled for in-house call no more frequently than
2006 every third night (when averaged over a four-week period). ^(Core)
2007

2008	VI.F.7.a)	Internal Medicine fellowships must not average in-house call over a four-week period. ^(Core)
2009		
2010		
2011	VI.F.8.	At-Home Call
2012		
2013	VI.F.8.a)	Time spent on patient care activities by fellows on at-home call must count toward the 80-hour maximum weekly limit. The frequency of at-home call is not subject to the every-third-night limitation, but must satisfy the requirement for one day in seven free of clinical work and education, when averaged over four weeks. ^(Core)
2014		
2015		
2016		
2017		
2018		
2019		
2020	VI.F.8.a).(1)	At-home call must not be so frequent or taxing as to preclude rest or reasonable personal time for each fellow. ^(Core)
2021		
2022		
2023		
2024	VI.F.8.b)	Fellows are permitted to return to the hospital while on at-home call to provide direct care for new or established patients. These hours of inpatient patient care must be included in the 80-hour maximum weekly limit. ^(Detail)
2025		
2026		
2027		
2028		

Background and Intent: This requirement has been modified to specify that clinical work done from home when a fellow is taking at-home call must count toward the 80-hour maximum weekly limit. This change acknowledges the often significant amount of time fellows devote to clinical activities when taking at-home call, and ensures that taking at-home call does not result in fellows routinely working more than 80 hours per week. At-home call activities that must be counted include responding to phone calls and other forms of communication, as well as documentation, such as entering notes in an electronic health record. Activities such as reading about the next day's case, studying, or research activities do not count toward the 80-hour weekly limit.

In their evaluation of fellowship programs, Review Committees will look at the overall impact of at-home call on fellow rest and personal time.
